GnarWolf chain guide installation and adjustment

- 1) Install to ISCG-05 tabs using provided M6 cap screws (12)
- 2) Shift to largest cog on cassette
- 3) Loosen bolt (11) and adjust vertically to provide approx. 2mm of clearance between top of chain and guide
- 4) Loosen cap screw (6) and position guide laterally such that inside edge of chain nearly touches inside of guide. tighten gently (2 Nm) to secure guide assembly.
- 5) Shift across cassette and confirm that chain does not rub
- 6) To remove chain, loosen cap screw (8) and rotate guide assembly clockwise
